

Love yourself enough to know

World Hepatitis Day is July 28!

Hepatitis A is spread by contaminated food &/or water.

Hepatitis B is spread through contact with an infected person's blood or other body fluids, such as semen.

Hepatitis C is only spread through direct blood to blood contact.

This is HEPATITIS!
It's closer than you think.
Know it! Confront it! Get tested!

1 out of every 12 people are infected with hepatitis B or C and they don't even know

www.whdcanada.ca

Vaccinations are available for Hepatitis A & B.
There is treatment available for Hepatitis C.
Talk to your health care provider for more information.
